1. The priority documents pertaining to the present application were not available at the time of establishing the first written opinion. Hence, it is based on the assumption that all claims enjoy priority rights from the filing date of the priority document. If it later turns out that this is not correct documents D1: WO 03/042147 A (BAYER CROPSCIENCE S.A.) and D2: WO 2004/002943 A (SYNGENTA PARTICIPATIONS AG) cited in the International Search Report could become relevant in order to assess whether the claims satisfy the criteria set forth in Article 33 (1) PCT.

2. The subject-matter claimed in the present application overlaps with the subject-matter defined in the document classified "X" in the International Search Report (ISER) on a generic and specific level. Hence, the overlapping area is considered not to be new under 33 (2) PCT and the Applicant is requested to delimit the claims accordingly.

With regard to the presence of inventive step reference is made to the documents classified "X" and "Y" in the ISER wherein the same or similar compounds possessing pesticidal activity have been disclosed. Substituents therein are the same as or similar to those given in the present application.

Taking into account these facts the man skilled in the art would have to expect the pesticidal activity without affecting their basic capabilities when modifying the basic moiety and/or the substituents of the groups of compounds disclosed in the state of the art. Thus representing only predictable effects the compounds claimed are considered to be obvious.

Consequently, at present, Claims 1 to 7 are also lacking inventive step under Article 33 (3) PCT.
